Re: *In re Purdue Pharma L.P., et al*, Case No. 19-23649 (RDD)

Dear Judge Drain:

I am writing to support Harrison Cullen's request to extend the deadline by Ninety days for filing of individual claims related to the above mentioned case.

I lost my only son in 2001 after he chewed an Oxycontin at a high school party which was easily obtained due to the overabundance of a street supply.

Since that dreadful day I tried to warn kids about this deadly drug by speaking at schools, rehabs, PTA's and churches. Once I learned why this pill was so easily available for kids to experiment with I also gave statements at congressional, FDA hearings and the 2007 sentencing of the three Purdue criminals Friedman, Goldenheim and Udell.

Through social media I have learned a lot of parents are under the impression that unless their child was prescribed oxycontin they cannot file a claim, an issue not addressed in any of the advertising I have seen on claim filing.

The COVID pandemic has taken away access to in person support groups where people could be informed of their rights and the looming deadline.

Following the IRS lead of extending important deadlines by 90 days, I believe this is also the prudent thing to do in this case.

Sincerely,

Edward J. Bisch

Edward J Bisch
